A portable re-bar bending tool

Last Updated: Friday, September 15th, 2000, Created: Thursday, September 14th, 2000

Hitichi let me play with a prototype of a portable machine that will bend re-bar to any shape you want, with absolutely no effort. Expensive and used for heavy construction sites -- but a really nifty gadget. It is like playing with re-bar like they were paper clips.
